

I have a dream that the world would be a peaceful place and nobody would start a war. If you would start a war lots of people are going to die. The earth would be lonely. If you like the war you should recheck that. The earth is going to be lonely because almost all the people will be dead. The U.S.A. is really no use now if it is like this. The war kills people and their family members will miss them. If the people in the war would not agree to stop the war, I'll tell them they would probably be dead and buried under ground.

If you join the war it feels painful. You can get shot a lot of times. You might also get hurt and go to the hospital. Your family members will be worried about you if something bad is going to happen about you. You might die. That is why I want to end the war of all countries. I want our country to fight but with words, not guns. Then the world would be peaceful, and less violent place.
