

I have a dream that this world would be a better place. The first thing is that we should stop littering and start recycling. Did you know that only 25% of this world is recycling? It is good to recycle because then we could use things like water bottles over and over again.

The second thing is that we should stop pollution. We should stop pollution because then all the animals would die. Also, water pollution is a serious problem because if the water is polluted, drinking the water could be dangerous.

The last thing is that we should stop putting things in the water or things that don't belong in the water. This is bad because then fish will die and other animals in the water. Some people still think that they could dump dirty stuff like oil into the water, because they have nowhere else to put it.

I hope that from reading this you will learn a lesson about littering, starting to recycle, stopping pollution and, water pollution can really help make the world a better place.
