

I have a dream that everyone would destroy their weapons and all the other things that could kill or hurt people. I don't like people being killed. If we could have no more weapons there will have no more wars. So no one could be killed.

One weapon we should destroy is guns. Police men don't need a gun because they do not shoot criminals, only arrest criminals. People don't need any bombs. When bombs explode they destroy a tiny piece of the world and kill nice people. Bombs are very big. Missiles are another thing that should be destroyed. It can also make a big damage.

I think Navy ships should be destroyed. The navy ships only shoot cannon balls and another reason is that it's a waste of metal. Tanks are a waste of metal and shoots missiles which is no use. A tank is a waste of metal because it's big and made out of metal.
